The Symposium on the Role of Artificial Intelligence in Society was held in San Francisco, California, from March 8-10, 2023. The symposium brought together leading researchers, policymakers, and industry leaders to discuss the latest developments in AI and its potential impact on society.

The symposium was organized by the AI Now Institute at New York University and the Stanford Institute for Human-Centered Artificial Intelligence. The event was sponsored by Google, Microsoft, Amazon, and Facebook.

Symposium Proceedings

The symposium proceedings are available online at the AI Now Institute website. The proceedings include the following:

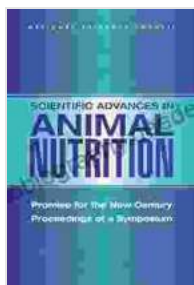

* Keynote speeches from leading AI researchers, policymakers, and industry leaders
* Panel discussions on the following topics:
* The ethics of AI
* The economic impact of AI
* The social impact of AI
* The future of AI
* Research papers on the latest developments in AI
* Workshops on the following topics:
* AI for social good
* AI and the law
* AI and education
* AI and healthcare

Key Findings

The symposium identified a number of key findings, including the following:

* AI is a powerful technology that has the potential to revolutionize many aspects of our lives.
* AI is also a complex technology that raises a number of ethical, social, and economic concerns.
* It is important to develop AI in a responsible way that takes into account the potential risks and benefits.
* Governments, businesses, and civil society organizations need to work together to develop policies and regulations for AI.

The Symposium on the Role of Artificial Intelligence in Society was a successful event that brought together leading researchers, policymakers, and industry leaders to discuss the latest developments in AI and its potential impact on society. The symposium proceedings provide a valuable resource for anyone who is interested in learning more about AI and its implications for the future.
