## History of Transnational Feminist Movements

The history of transnational feminist movements can be traced back to the late 19th century, when women from different countries began to organize around issues such as suffrage, education, and labor rights. These early movements were often based on a shared understanding of the oppression

faced by women under patriarchy, and they sought to create a more just and equitable world for all women.

In the 20th century, transnational feminist movements continued to grow and expand, with activists working on a wide range of issues, including reproductive rights, violence against women, and economic justice. These movements were often at the forefront of social change, and they played a key role in shaping the development of international human rights law and policy.
