The brainchild of entrepreneur and inventor Suzanne Selfors, the Wedgie Gizmo emerged from a simple yet profound realization: the persistent discomfort caused by underwear wedgies.

The Problem of Wedgies

Wedgies, the dreaded result of underwear bunching up uncomfortably between the buttocks, have plagued individuals for centuries. The discomfort they inflict can range from mild irritation to excruciating pain, especially during physical activity or prolonged sitting.

Despite the widespread prevalence of wedgies, no effective solution existed until the advent of the Wedgie Gizmo.

The Invention of the Wedgie Gizmo

Suzanne Selfors, a self-described "avid exerciser," had grown weary of the constant discomfort caused by wedgies. Inspired by her own experiences, she set out to find a practical solution.

After experimenting with various materials and designs, Selfors stumbled upon a breakthrough: a small, triangular-shaped device made of soft, flexible silicone. This device, when worn inside the underwear, gently lifted and separated the buttocks, effectively preventing wedgies from forming.

Recognizing the potential of her invention, Selfors filed for a patent and launched her company, the Wedgie Gizmo, in 2011. What began as a personal quest for comfort quickly evolved into a mission to alleviate the misery of wedgies for countless others.
